PayCheckCity.com Launches Career Center *Symmetry Software Offers Career Networking*

SCOTTSDALE, Ariz. (January 8, 2008)...Symmetry's most popular Web site, PayCheckCity.com, announced today the addition of a new career section. The "Job Board" allows registered users to search for jobs, submit resumes, create company profiles and post employment opportunities. This will allow registered users to network with about 200,000 professionals who visit the site routinely.

PayCheckCity.com receives more than 4.5 million page views each month and is one of the most-visited payroll support sites on the Internet. The site offers employees self-service tools for paycheck management, including free personal finance calculators.

According to Frank Tresnak, business development manager for Symmetry Software, PayCheckCity.com is a great resource for busy payroll professionals and the company is doing all it can to provide them with the most useful information.

"About a year ago, we realized we had a great untapped resource: access to millions of employees from every kind of business across the country who login to PayCheckCity.com regularly. That led to the creation of polls on the site featuring questions about various payroll-related and human resources issues." said Tresnak. "Our newest enhancement is a jobbing center that helps both our community of professionals and their businesses."

If you are an employer seeking a payroll professional, accountant, HR or finance professional for your company, you can create a personalized account to find qualified candidates who might be a good fit for your organization. Employers can also post open positions, search posted resumes, and learn about Symmetry Software's recruitment products.

As a professional seeking new employment, you can create an account to help find your next dream job. Your personal job seeker account will allow you to search jobs, manage your resumes, and set up job alerts.

The career center can be found by visiting www.PayCheckCity.com. Click on the "Job Board" tab in the top, right-hand corner of the site's homepage.

For more information about Symmetry Software or the “Job Board”, please contact Frank Tresnak at frank@symmetry.com, or call 480.596.1500.

About Symmetry Software

Founded in 1984, Symmetry Software specializes in payroll and payroll-related withholding tax software applications for the Internet and corporate intranets. Based in Scottsdale, Ariz., Symmetry runs three payroll-related Web sites:

- www.PaycheckCity.com: Symmetry’s most popular Web site receives more than 4 million page views each month. As one of the most-visited payroll support sites on the Internet, this Web site offers employees self-service tools for paycheck management including free personal finance calculators. Individuals can model “what-if” scenarios using their wages and other paycheck figures to determine the impact on “take-home pay” when they adjust their withholding, add the impact of voluntary savings programs and retirement plans, note the tax advantage of cafeteria benefit plans, change marital status or have a baby.
- www.StateW4.com: Making one’s way through the maze of state withholding requirements and forms is a challenge for the most experienced HR professional. Symmetry’s www.StateW4.com is a “must-have” tool for companies with employees in multiple states. Using the site’s online form-preparation process for federal, state and local withholding forms, which includes built-in error correction and data validation, can ensure that HR departments have access to the latest reciprocity information and forms.
- www.Payroll-Taxes.com: This Web site has a payroll research library for industry professionals that also includes free paycheck calculators and a paycheck community message board.

For more information please visit www.symmetry.com or call (480) 596-1500.
